Safe Harbor Statement

The following is intended to outline our general product direction. It is intended for information purposes only, and may not be incorporated into any contract. It is not a commitment to deliver any material, code, or functionality, and should not be relied upon in making purchasing decisions. The development, release, and timing of any features or functionality described for Oracle's products remains at the sole discretion of Oracle.

Agenda

- 1 Enterprise Mobile Challenges
- 2 Oracle Mobile Strategy & Solution
- 3 Oracle Mobile Cloud Service
- 4 Demo

A young man with short brown hair is in the foreground, looking thoughtfully at a laptop screen. He has his hand resting on his chin, holding a black pen. In the blurred background, two other people are visible: a woman with blonde hair seen from behind, and a man in a maroon shirt standing. The setting appears to be a modern office or library with bookshelves.

Enterprise Mobile Journey (past 10-15 years)

Operations Focused

1. Mobile solutions targeted at automating field operations (opex)
 - B2E Applications like Field Service, Field Sales, SFA, DSD
2. On-Premise Systems of Record
 - ERP, CRM, Logistics
3. Each app focused on single user/persona
 - Field Service Worker, Field Sales Rep
4. Significant Investment
 - Application, IT Skills, Support

Challenges

1. Custom Fit
2. Point Solutions (roll-your-own)
3. Long development lead times
4. Difficult to enhance, upgrade or change
5. Security concerns
6. Hardware end-of-life
7. Rising Costs / TCO
8. Resource / Skills Availability

Success

Enterprise Mobile Journey (Today)

Top-Line Revenue Focused

1. Business Technology getting engaged to drive Revenue
2. Field Organizations driven towards Profit Centers
3. Customer Experience a High Priority
4. Target “other” Personas with Mobile
 - Augment – Enhance – Replace
5. Mobile First, Mobile Time (LBS, Notification, Real-Time)
6. Digital Experience is a path to realize
 - Mobile, Social, Bi

Challenges

1. Number of Applications in Roadmap
2. Time to deliver each application
3. Updates per year each application
4. Systems & Services required for each application – Internal / External
 - Data/Device/App Security, Identity Management
5. Skillsets required to deliver application
 - LoB SME, BE Dev, FE Dev, Ops

Enterprise Mobility Trends

50% of current
apps will be re-
written

80% of
enterprises have
a backlog of up to
20 – 25 mobile
apps

*By 2017, companies will
spend **\$189 billion** to
enable mobile services*
- Forrester Research

*By 2024, enterprise will deploy
between **300 – 1400** based on
the # of employees*
- Gartner Research

Enterprise mobility is hard

ORACLE

Why Oracle Mobile?

Let's start with
a simple
Mobile App – A
HR App

And Map It To The Systems Of Record

Core HR, PeopleSoft,
SAP On premise

MCS Storage

Talent Management
Taleo Cloud

Core HR

Talent Management
Taleo Cloud

Social Networks
Twitter, Facebook, LinkedIn
Web

Core HR, PeopleSoft,
SAP On premise

Map Service
Google Web

This Simple App Soon Became Complicated

Oracle Mobile Cloud Service

Making mobile simple

A set of Cloud-based mobile services designed to make app development & integration quick, secure & easy to deploy.

Oracle Mobile Cloud Service

Business Drivers

Geared for all involved Personas

Mobile App Developer

"I create the mobile applications that call backend services"

Mobile Developer

Service Developers

Service Developers

"I create the backend services that mobile applications call"

Line of Business Stakeholders

"I am responsible for the success of our mobilization strategy"

LOB Stakeholder

MCS Admin

MCS Admin

"I administer MCS for our company"

Enterprise Architect

"I make sure we have a secure, scalable solution"

Enterprise Architect

Mobile Cloud Service Demo

Oracle Mobile Application Framework

Productivity Boosting Framework

- Build Once, Run on Multiple-Platforms
- Simpler Extensible UI development
- Javascript / Java for business logic
- Integrated Security
- Full Access to Native Device Features
- Modular, Reusable Application Components
- In App configurability
- Disconnected: SQLite with Encryption

Cross Platform Native User Experience with MAF

Basic Components

Data View

Visualizations

Oracle Enterprise Mobility Management (EMM)

Secure user identity, app, data and device

Mobile Identity

- **Single sign** on across mobile apps
- Risk / context aware step up authentication
- Self service and delegated administration
- Certificate LCM

Mobile Content Management

- **Secure container & app tunnel** for securely accessing and storing corporate content
- Strong DLP policies to avoid data leakage
- File manager and doc editor / viewer for secure content collaboration

Mobile Application Management

- **App centric** security policies
- Inbuilt PIM apps
- Zero code wrapping technology
- App store for distribution
- Secure apps built on MAF

Mobile Device Management

- **Device centric** security policies
- Device enrollment
- Device control
- Device inventory

By 2017, enterprise mobility management integration will be a critical identity and access management requirement for 40% of buyers, up from fewer than 5% today. – Source: Gartner

In Closing

Today's mobile enterprises...

Have

- Some Mobile Apps
- Some Mobile Skills
- Fixed Budget for IT / Dev

Want

- To Build More Apps, Faster
- To Target New Users / Personas with Mobile
- To Augment & Enhance

Need

- To leverage existing skill-sets
- To leverage existing integration investments
- To optimize mobile services
- To extend enterprise grade security & reliability
- To measure Mobile Success
