## **Migrating Customers from World to EnterpriseOne**

There are still 33 percent of World customers on release A7.3. Our goal is to migrate these customers to the latest release of EnterpriseOne to modernize their ERP and get the most out of their JD Edwards software investment. This category calls for stories about migrations from any release of JD Edwards World to EnterpriseOne in the last 18 months. Supporting information should include release information and what business processes were enhanced by the upgrade. Describe the savings the customer realized from improved business processes, for example reduced delivery times, more efficient inventory management etc.

*Requested information:* Include a brief description of the project, customer name, JD Edwards release from/to, location, industry, how the upgrade improved business processes, how much time the upgrade took, what methodology the partner used, which new Oracle products were sold to the customer as part of the upgrade and the associated Oracle revenue, etc.

You can enter up to 10 examples in this document for this category. If you need addition pages, start a new form.
